Professional Summary

Highly analytical and detail-oriented Management Information Systems (MIS) graduate with a strong foundation in data analysis, BI dashboarding, and database management. Combines academic excellence (3.5/4.0 GPA) with hands-on project experience utilizing SQL, Python, and Power BI to extract actionable business insights. Adept at data cleaning, exploratory data analysis (EDA), and transforming raw datasets into interactive reporting solutions.

Technical Skills

- **Programming & Data Analysis:** SQL (PostgreSQL, MS SQL Server, Query Optimization), Python (Pandas, NumPy, EDA)
- **Business Intelligence & Visualization:** Power BI (DAX, Data Modeling, Power Query), Dashboard Development, KPI Tracking
- **Data Management & Tools:** Relational Databases, ETL Processes, Data Validation, Advanced Microsoft Excel (Pivot Tables, Power Pivot, Reporting Automation)

Professional Experience Data Analyst (University Work-Study)

Computer Center – University of Jordan | Amman, Jordan Feb 2021 – Jul 2025

- Analyzed university-wide administrative and student enrollment datasets to identify retention trends, patterns, and performance insights.
- Developed Power BI dashboards tracking student metrics and departmental resource allocation, utilized by university administration for internal reporting.
- Optimized SQL queries for internal databases, improving data retrieval times and overall database performance for daily reporting tasks.
- Performed data cleaning, transformation, and validation to ensure absolute data accuracy and reporting reliability.
- Documented analytical workflows and reporting procedures to support scalable and repeatable administrative processes.

Projects & Technical Training

Data Analytics Trainee & Project Developer

Remote Work & Freelancing Technical Training Program Sept 2025 – Dec 2025

- Developed an end-to-end sales analysis portfolio project utilizing Python (Pandas, NumPy) for data preprocessing and exploration data analysis (EDA).
- Designed interactive Power BI dashboards to visualize operational KPIs, revenue trends, and business metrics based on complex simulated client datasets.
- Extracted and structured relational database data using advanced SQL techniques to build automated, Excel-based analytical reports.

Education

Bachelor's degree in management information systems (MIS) University of Jordan - Amman, Jordan GPA: 3.50 / 4.00 2021 – 2025
